-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-23, 27-29, 31-32, 34-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walter in view of WO 99/54863.

Walter discloses a projection device comprising:

Buoyant body (10) having a first outer surface (13) and a second planar outer surface (11) with a space formed between;

a screen is formed at the second surface upon which images from a projector (61) is received.

The walls of the structure are formed of individual air inflatable pockets.

Walter sets forth the structure being formed in a balloon or cylinder shape.

Tie lines (32, 33, 34) may be provided.

Walter does not specify locating the projector at the first outer surface.

WO 99/54863 teaches an alternate inflated projection device wherein the projector (2) is located essentially on an outer surface opposite that having the screen.

It would have been obvious to one skilled in the art at the time of the invention to modify the device of Walter by locating the projector at the opposite end in order to utilize all of the free space within the structure for forming enlarged images.

As regards Claims 22 and 23 it would have been obvious to one skilled in art to modify the device of Walter by forming the structure in shapes other than the two disclosed because such modification is a choice of aesthetic design. Spherical shapes would necessitate spherical screens. It further would have been obvious to attach the screen in any of known fastening methods.

Allowable Subject Matter

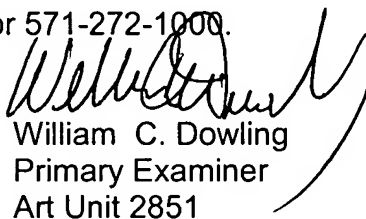

3. Claims 24-26, 30, 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Dowling whose telephone number is 571-272-2116. The examiner can normally be reached on MON-THURS.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on 571-272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
